RRE Properties was proud to market a mixed development in Green Square. A real test for a site that was built amongst much publicity surrounding the Green Square station and largest urban redevelopment in Australia today. City View apartments built by renowned Soneco Apartment Projects consisted of Terraces, apartments and commercial facilities. Located in close proximity to all Green Square facilities, the project proved extremely successful with a new inner city demographic, much anticipated by RRE Project management team. Experience within our team and marketing guides proved invaluable to the selling process of what was one of the largest projects in Green Square.
